

### Town Schools Re-open September 3rd

The school bell will ring again in Didsbury on Tuesday morning, September 3rd when the Didsbury Public and High Schools will re-open for the fall and winter terms.

### Junior Wheat Club Competition

The standing wheat crops of the Didsbury Junior Wheat Club were judged by Mr. Hugh McPhail, district agriculturist, Olds, this week.

Mr. McPhail stated that there were some excellent stands of wheat and that the boys should be able to make a splendid showing at their seed fair. He also said, however, that the weeds in many plots were bad, which made the boys realize the toll that weeds take from the crop.

The following was the standing of the members:

1 John Kohut	2 John Bruce
3 Henry Brown	4 Glen Levagood
5 Allan Chandler	6 Walter Neufeld
7 Grenville M'Caig	8 Lester Krebs
9 Harold Burns	10 Alex McNair
11 Geo. Gillrie	12 Cyril Brooke
13 Lester Barnes	14 Wm. St. Clair
15 Ray. Hehn	16 Stewart Tighe
17 Dan Morasch	18 Donald Schultz

### Local Theatre Features "Canada Carries On."

The local movies are featuring a new series of interesting pictures, "Canada Carries On." These films are made in Canada under the direction of the Dominion Government and depict phases of Canada's war effort.

The first of the series was screened last week, when in "A Letter from Aldershot" something was shown of the activities of the Canadian Expeditionary Force in England.

This weekend "Atlantic Patrol" will show the Canadian Navy at work in all its different activities for the defence of our eastern shores.

There are about 12 films in the series and Mr. Sharp informs us that the rental cost is about double that of the regular feature film. The proceeds of these pictures are devoted to Canada's War Effort.

Mr. and Mrs. Robert Morris of Bon Accord, Alberta, visited Rev. J. M. and Mrs. Fawcett at Knox Manse on Monday and Tuesday. Miss Corrine Vance, who had been visiting at the Manse for a couple of weeks, returned with them to her home in Edmonton.

36-Hour Film Service at Law's Drug Store — 25c a roll.

### Labor Day Monday, September 2nd

Monday, September 2nd having been declared a public holiday, stores and business houses in Didsbury will be closed all day Monday and open all day Wednesday September 4th.

### Good Crops Estimated for the District

According to estimates made by the elevator men, Didsbury will harvest one of the largest crops in years.

The estimated acreage of wheat sown is 45,000 acres, which is expected to yield 25 bushels per acre. If expectations are achieved, the total wheat yield should be one and a quarter million bushels.

In coarse grains the expectation for oats is 800,000 bushels from an estimated 10,000 acres.

Prospects for barley are also good and from 12,000 acres seeded a yield of 480,000 bushels is expected.

Most of the coarse grains and a considerable quantity of wheat will be fed on the farms, but it is estimated that upwards of a million bushels of grain will be marketed at this point.

### Better Than Average Storage

Didsbury is in a fortunate position as compared with some other points in respect to grain storage, according to elevator men.

The present storage space at the present time in the six elevators here is 265,000 bushels. With new storage of 110,000 bushels, provided by the annexes to be built, the storage space available will be 375,000 bushels.

With the estimated acreage of 45,000 of wheat, the present quota would be 225,000, so it is reasonable to expect that the quota at this point can be extended.

This, however, should not stop farmers from providing as much storage on the farms as possible, as it is pointed out that it is not known as to how fast grain can be moved to the terminals.

Reduction in ratio for grain storage from 1.30th of a cent a bushel to 1.45th of a cent per day was announced by E. B. Ramsey, chief of the board of grain commissioners for Canada. This applies to line elevators and terminals. It is probable, however, that it is the rate to be allowed farmers for storing their own wheat, since government quarters have said farmers would be allowed the same rate as elevator companies.

### Mightiest Flag on the Mightiest Ship.

Between the great guns of H.M.S. Hood, the world's mightiest battle cruiser, flies the White Ensign of the British Navy, a flag that brings hope to the suffering and terror to the tyrant.

### School Fair Wednesday, Sept. 4

The annual School Fair at Mountain View Community Hall will be held on Wednesday, September 4th. The fair this year should be better than in previous years as a larger number of schools will take part.

The schools that are entered are Rosebud, Grand Centre, Gore, Mona, Neapolis Junior, Siebertville and New Bergthal senior and junior. The judges in all classes will be supplied by the Provincial Government.

In the afternoon the usual sports will be held including the relay race for the cup.

### Knox United Church Notes

Next Sunday will be observed as Annual Flower Sunday. The minister will speak on "The Message of the Flowers." Flowers to decorate the Church will be gratefully received, and arranged on Saturday evening if brought to the Church.

Do not forget that the Church School has begun again after the holidays.

The Church School picnic, that was postponed in early summer, will be held on Wednesday, August 28th at the home of Mr. and Mrs. Bruce Parker. All the families of the Church will be welcomed, and all are asked to gather at the Church by 2 p.m.

The Westcott congregation are having a bee on Friday this week to paint the church, and work in the cemetery.

### U.F.A. and U.F.W.A. Constituency Convention

There was a good attendance at the annual Didsbury Constituency Convention and picnic of the U.F.A. and U.F.W.A., held at the Lone Pine Hall.

Mr. Ray Wood, president, of Carstairs, presided.

Mr. Ray Wood and Mrs. A. J. Cameron (Three Hills), president and vice-president respectively, were both re-elected.

Directors-at-large are: Didsbury East, P. J. Rock, Morrin, and Didsbury West, R. McNaughton.

Directors elected were: District No. 1, A. J. Cameron, Three Hills, and Mrs. Young, Swallow; District No. 2, John Earl, Acme, and Mrs. A. J. Cameron; District No. 3, Mrs. N. Eckel and G. A. Burns, Didsbury and District No. 4, Mrs. W. E. Stiles and Mr. Ed. Parker, Didsbury.

A hearty vote of thanks was accorded Mrs. Cora J. Kearns, who had long held the efficient secretary-treasurer's office. The meeting expressed regret at losing the services of Mrs. Kearns on account of ill health, and Mrs. N. Eckel was elected as secretary-treasurer.

Several resolutions were passed, one dealing with the 5-bushel per acre legislation as being inadequate.

E. M. Brown, M.L.A. for the Didsbury constituency, addressed the meeting, taking for his subject the new Health Unit.

Mr. George Church of Bow River, member of the U.F.A. provincial executive, spoke on "Co-operative Buying and the Wheat Question."

The meeting was then adjourned.

### Many Changes in Rural Schools

There have been a large number of changes in the teaching staff of the Olds School Division, the following being a list of teachers placed in the schools adjacent to Didsbury. The schools in which the teacher has been changed are denoted by the letter "c" in front of the name of the school:

Cremona:	Robert Reid
	Lorna Bealer
c Bergen:	Warren Bailey
c Big Prairie:	Ruth Kidd
Burnside:	Fred Evans
c Cloverm't.:	Kathleen Keen
c Coburn:	Cora Elliott
Davenport:	James Rae
c Eidsvold:	Orvy Davidson
Elkton:	J. S. Armstrong
c Fallen Timber:	Earl Brabbins
Garfield:	Frances Taylor
c Gore:	Mabel Sherriff
c Grand Centre:	Vola Farr
c Huntcliffe:	Elizabeth Dean
c Hawkeye:	Mary Wrigglesworth
c Innis Lake:	Jean Kirker
c Inverness:	Marguerite Bingeman
c Jackson:	Constance Bulmer
c Jutland:	Mrs. A. C. Ball
Melvin:	Nora Camp
c Mona:	Ronald Lyons
Neapolis High:	Frank Lowe
c Neapolis Junior:	Francis Hendrickson
c New Bergthal High:	Carl Bingeman
New Bergthal Junior:	Kay Blackley
c Poplar Creek:	Idris Jenkins
Rosebud:	Alice Weiss
Rugby:	Alberta Hutchinson
c Springside:	Jean Grant
c Stuart:	Mrs. M. Guitard
Waterloo:	Louise McEwen
Westcott:	Lovell Patmore
c Westerdale:	Reis Richards
c Zella:	Willard Pybus
c Meadowsdale:	Jo Booker

All schools in Olds School Division No. 31 will reopen for the fall and winter terms on Monday, September 2nd.

### Must Obtain Permits to Deliver Grain

Under the regulations limiting the deliveries of wheat, oats and barley, it is necessary for all farmers to obtain a permit book issued by the Canadian Wheat Board before they can deliver grain to the elevators, loading platforms or mills. It will also be necessary for the producer to take the book to the Municipal Secretary or other person authorized to administer oaths and statutory declarations with regard to the acreage he has in crop.

At the time of receiving the permit the producer shall select one town or delivery point where he wishes to deliver his grain which will be entered on the permit and no grain can be delivered at any other point.

The delivery quota allowable to each producer shall be in net weights or that is, after dockage is deducted. The aggregate deliveries from the farming unit shall not exceed the quota established by the Wheat Board. The first quota that has been established is for the delivery of 5 bushels per acre of wheat, oats and barley.

Your snapshots developed and printed at 25c roll — Law's Drug Store, 36-hour service.

## Powerful But Mysterious

Great, powerful but mysterious is the drug Colchicine.

Colchicine is a word to conjure with. It is a drug which has latent within it enormous benefits for mankind in more than one field, but at the same time contains potential dangers alarming to contemplate.

In the realm of medicine, colchicine has been used in minute doses with beneficial effect in the treatment of gout. Used recently on a small experimental scale it was found that it will destroy cancerous tumours, but on the other hand, that it will cause cancer.

In the fields of horticulture and arboriculture, it has very recently been discovered that colchicine can be utilized to very materially increase the productive power of certain forms of plant life. Colchicine has been used to evolve new varieties of plants, to increase the sizes of stems, blooms and seeds of existing varieties of plants and to hasten the maturity of some varieties.

The Toronto Daily Star reported an experiment at the University of Illinois College of Medicine in which colchicine was used to treat four hopeless cases of cancer, following the discovery of an English scientist that colchicine will stop or delay the division of cancerous tissue cells. While the lives of these four patients were not saved, some interesting and perhaps important effects were revealed. In all four cases, in a week or two the colchicine caused large cancers to start breaking down, but two of the patients died of colchicine poisoning before the cancer regression had gone far.

"In the other two," to quote the Toronto Star, "large cancers mostly disappeared after several weeks. It was then that the effects appeared which the physicians report was startling. Around their edges the malignant tumours began to grow again and this second growth was much more rapid than the original. One patient became bald while the cancer was breaking down. When the tumour began to grow again a full head of hair reappeared."

### Some Real Benefits

It is quite evident that colchicine has an important influence upon cell division. This has been confirmed by scientists working in fields other than medicine. They have discovered that, in plant life, colchicine has the power of multiplying chromosomes within the cells, and more particularly those which contain a normal number of cells, known as diploids, as contrasted with polyploids, or those plants which contain a large number of cells.

Among those in the forefront of this type of experimentation in plant life is Dr. F. H. Peto of Ottawa, who has found that colchicine can be used beneficially on diploid plants to materially increase size, productive power and to hasten maturity and it is in this field that colchicine is destined to yield early and important benefits to mankind.

Working first with flowering plants Dr. Peto discovered that the use of colchicine resulted in doubling the size of snapdragons and phlox with remarkable increases in size of stem, leaf and seed. Similar results were secured with clarkia and larkspur and in addition the period of bloom was lengthened and fragrance strengthened.

Still later, Dr. Peto found that by using colchicine on sugar beets that he could produce a new polyploid beet yielding a 13 per cent. increase in size and a 15 per cent. increase in sugar content, a discovery which should be of immense value to the sugar beet industry in Alberta and opens up the possibility of developing a beet seed export industry in British Columbia.

### Value To The Prairies

Perhaps the greatest value of the application of colchicine to plant life in the prairie provinces lies in the possibilities of reforestation and afforestation. Hopes are held out of not only developing new and valuable varieties of trees but of speeding up growth and thus reducing the cost of production of trees of timber value. Such a discovery has great potential value in the northern reaches of the prairie provinces where forest areas have been denuded by fires or exploitation, and on the open prairies where quick growing trees, possessing both an economic and aesthetic value would be more than welcome. It also opens up the possibility of developing fruit trees of real economic value suitable to prairie conditions.

The task of improving on Nature in the development of trees until now has only been attempted by selective and hybridization processes. "Chromosome doubling, however," according to Sidney M. Katz, in a recent issue of the Magazine Digest, "has presented a new approach. 'Some 30 species of trees,' says this writer, 'have been treated with colchicine, and while it will take the better part of a lifetime to pass final judgment, there is evidence on hand that rich new varieties will be induced without great difficulty.'"

"One of the main reasons for the forest breeder's optimism," continues Mr. Katz, "is that in Sweden polyploid forms of some native Canadian trees exist in a natural state. They are trees of great economic importance. Basing their opinions on observations made in Sweden, biologists speculate that the new polyploid trees in Canada will grow more rapidly than the diploid. Speedy growth is an important economic factor in forestry, because, as Dr. Walter Mulford of the University of California estimated, 'To cut the growing time of a tree at any stage, will reduce the growing cost exactly 40 per cent.'"

Laboratory work to date appears to indicate that colchicine is likely to confer material benefits on mankind in the realm of horticulture and arboriculture in the very near future. What hope it holds for man in the treatment of disease seems more remote, although this avenue is not being neglected; for experiments are now being made in an effort to secure the beneficial effects without the destructive aftermath.

### Fourth Meatless Day

The Italian government decreed that Tuesday shall be a meatless day, making four such days a week, and ordered sharp rationing of bread served in restaurants. The ministry of agriculture announced at the same time that eating of more fruit would be encouraged.

The difference between green and black tea is that in producing the latter the leaves are allowed to ferment.

### Not Really Impossible

Canada Might One Day Be Centre Of British Empire

There has been recently, especially in United States papers and magazines, a good deal of discussion as to the possibility of Canada becoming the centre of the British Empire.

Such a development is not impossible. Writers on the prospects of imperial relations have not infrequently in the past pointed out its possibility. But if it does come, it will be not merely because of the disturbances in Europe or because of the central geographical position of the Dominion, but because Canada proves that it is worthy of the distinction.

Recent events have, of course, sharpened the discussion. Canada is across the ocean from the scenes of aggression and the war is bound to have a considerable effect on its industrial development. Canadian industry has already become a very important factor in its activity and in future, as capital seeking safer investment, flows into the country. Canada's financial organization has developed remarkably in the last 25 years too, while its broad acres and natural resources can make a home for a much greater population. But along with these things, much will depend on the strength of Canada's political organization, on the breadth of its world view and its avoidance of a parochial outlook in its own affairs.

Should the time come that there is a parliament of the British Commonwealth of Nations, Canada would, after all, be the logical place for it to assemble. —Sault Daily Star.

### SELECTED RECIPES

#### HONEY KRISP COOKIES

1/2 cup fat  
1/2 cup honey  
2 eggs  
1/2 cup sour cream  
1 1/4 cups flour  
1 teaspoon baking powder  
1/2 teaspoon salt  
1/2 teaspoon soda  
1/2 cup chopped nut meats  
1/2 cup chopped dates  
1/2 teaspoon nutmeg or  
1 teaspoon vanilla extract  
1 cup Kellogg's Rice Krispies

Cream fat and honey. Add well beaten eggs and sour cream. Sift flour with baking powder, salt and soda; combine with first mixture. Stir in nut meats, dates, flavoring and Rice Krispies. Drop from a dessert spoon onto lightly greased baking sheet and bake in moderate oven (375 degrees F.) about 20 minutes. Yield: Two dozen cookies (4 inches in diameter).

#### SYRIAN LAMB

14 Christie's Soda Wafers  
2 cups canned tomatoes  
1/2 teaspoon cinnamon  
1/2 teaspoon allspice  
1/2 teaspoon salt  
1/2 teaspoon black pepper  
1 cup coarsely chopped, cooked lamb  
1 tablespoon fat  
Cheese

Crumble soda wafers and add tomatoes and seasoning. Brown meat in hot fat and add to the tomato-cracker. Pour into greased baking dish, sprinkle with cheese and bake in a hot oven (425 degrees F.) 15 minutes. Six portions.

#### Trouble In Store

At a concert an old man was given the job of collecting tickets at the door. After a time he sought out the secretary.

"I think there is going to be trouble for you," he whispered, mysteriously.

"Why, what's the matter?"

"Bigamy, no less," was the ticket-collector's awed reply. "I've let in two women who said they were the secretary's wife, and now there's a third wanting to come in."

### A Favorite In Britain

One Of Ex-Kaiser's Grandsons Is Living In London

One of ex-Kaiser Wilhelm's grandsons will be raining bombs on England, when and if the invasion comes, and another will be dodging them somewhere in London's fashionable West End.

It was learned that Prince Louis Ferdinand, son of the former Crown Prince, has been given a lieutenantancy in Hitler's flying forces and is now assigned to the blitz squadrons.

Meanwhile, in a bachelor flat in Mayfair, another son the ex-Crown Prince, Prince Frederick of Prussia, is watchfully waiting—under surveillance and protection of His Majesty's government—for whatever may come to pass.

Prince Freddy has been a British favorite for years. When the war began, plans were made to ship him to Canada, and, apparently in fear of his life, Queen Mary requested that his movements and whereabouts be kept secret.

Recently the plans to send him to Canada were abandoned together with plans for evacuation of numerous children refugees, prisoners and suspected Fifth Columnists.

Prince Louis Ferdinand, favorite grandson of the ex-Kaiser and the only member of the imperial family whom Hitler really likes, has been in the United States a number of times and spent five years working in the Ford plant in Detroit.

### Left Small Fortune

Friends cleaning out the home in Glen Rock, N.J., of the late Fred Kooreman, an apparently poor gardener who immigrated from the Netherlands 44 years ago, were astounded to discover \$24,000 in cash hidden in a crude tin box. He left no will.

## Britain Destroys All Signs And Landmarks To Make Matters Difficult For Invader

Many years ago there was a popular song concerning a certain "Bill Jones," of which the last line of the chorus ran "e don't know where 'e are."

Any German parachutist who descends from the skies upon Britain probably will be in the same predicament as "Bill Jones," for he certainly won't "know where 'e are." Even the British often are not quite sure of their whereabouts. This is all because in recent weeks work has gone ahead to obliterate every indication of locality.

Generations ago sign posts were set up along the highways and lanes, and these stood at their stations until recently. The fingers of these posts bore such legends as "To London 10 Miles" or "To Bristol 5 miles," or to take more remote places, "To Moreton-in-the-Marsh 2 miles," or "To Stow-in-the-Wold 1 mile." All these are being removed.

Then, too, all along the old highways stand milestones, which in most cases have rested there for centuries. These, too, are being removed or the inscriptions chipped out.

Those are old markers. There are others which are relatively new. Set in the fields along the railways, in normal times, may be seen advertisements. Beneath the signs there usually was hung a smaller board saying, "London 20 miles." These also are going.

So are the names of railway stations, both on the platforms and outside. These, if not wholly removed, are being so reduced in size as not to be visible for more than a few yards. Outside, the name is being removed altogether. All the stations of the London passenger transport board bear a sign familiar to all Londoners and visitors. It is a red ring about a yard in diameter. Across the ring in bold letters is the name of the station—"Piccadilly," "Marble Arch," etc. Where any such station lies on the surface, as often is the case in the suburbs, the bold lettering is being covered by pasted-on slips giving the name in thin two-inch lettering readable only at close range and in good light.

Where a local postoffice says "Northtown Post Office," or a village store announces that its prices are the lowest in Southtown these place-names must go. So must hotel and other local advertisements disclosing locality. So must a thousand other signs which might give a parachutist, or a fifth columnist a clue to his whereabouts.

The number and variety of these clues is surprising and has involved close searches. For example, there are inland revenue notices, jury lists, voters' lists and parish notices posted on the church porch. There also is the telephone call box. To a trained-to-observe enemy, given half an hour or so at large, any of these might betray a locality.

One result of this blotting out of names and places is that drivers and pedestrians frequently are lost in unfamiliar places.

Another change is apparent. Normally a person who asks his way by day or night receives a ready answer. To-day he will more likely be met with a request to produce his identity card, and in any case he will likely be refused all information and perhaps be shadowed. The reason is that people are asked by authorities to be suspicious when asked by strangers for any information. One night recently a man in cloak with a peaked cap asked for information. He narrowly escaped being attacked by a crowd. The man was a Belgian army officer.

These instances are more likely to happen in country or outlying suburban districts than in towns. There are many parts of outer London where the roads are deserted after about 10 o'clock at night.

### Mercury From B.C. Mine

First shipments of mercury from a British Columbia mine that may produce enough of the vital war mineral to supply Canada's needs and a portion of the Empire's has been sent to Montreal.

### Sympathy Usually Wasted

#### Zoo Keepers Believe Most Animals Are Happy In Captivity

Three years ago a member of the staff of Trailside Museum, in the Bear Mountain area of New York, caught a grey cub fox and placed it in a spacious kennel. A few weeks ago, in pursuance of the policy to replace old animals with younger ones, the door of the runway was opened to set the grey fox and three red ones free in the 4,000 acres of mountain park. The red foxes scooted away, but the grey fox remained. Next day he was pushed out.

But Brer Fox is not happy. He liked his old home and refuses to go away. He hangs around the museum and is so tame that he comes and cats out of an attendant's hand. He has made a lair for himself in a tangle of hemlock and responds to a call from any of his old friends on the museum staff.

Poets have for ages sung of the glories of home, and even birds and animals have a passionate love of their homes. To the grey fox of Trailside the freedom of Bear Mountain and the joy of hunting for his own food are nothing compared to the happiness of his home in the museum. A fox is by nature one of the wildest and untameable animals, and should, in the nature of things, even try to escape from captivity. Many people deplore the spectacle of wild animals cooped up in zoos. The modern type of zoo with lots of roaming space in surroundings closely approaching the natural habitat of the animals, is too costly for all but a few municipalities that have zoos. But sympathy is wasted on most captive animals. Zoological keepers say that nearly every animal is inherently lazy, and it is only the necessity of hunting for food and water that makes them stir themselves. All they want to do is to eat, drink and sleep. Zoo animals have all their wants brought to them. Therefore, they are quite happy and need no sympathy.

Perhaps the Trailside fox is one of the kind that was born tired and does not like having to work for his living. St. Thomas Times-Journal.

### Just A Viewpoint

#### Germany Likes To Believe She Has Never Been Beaten

The London correspondent of the Ottawa Journal, says:

Hitler's press drew a sharp distinction between France's request for an armistice and Germany's in November, 1918. The difference, according to these lying commentators, is that, whereas the French army was beaten, the German army never was.

Dr. Goebbels' lie department has so driven that pretty fiction home to German ears that nearly every German firmly believes it. But not some of the 1918 German troops one suspects. Actually in 1918 Germany's mighty military engine was beaten to a frazzle. Ludendorff's reiterated appeals to the German peace emissaries were couched in fervent terms, urging that not a moment was to be lost, because the German army was on the verge of complete collapse.

Within six weeks it had lost over half a million prisoners and guns enough to souvenir every hamlet in France and Britain. Eyewitnesses recorded that, as they waited on Foch in his railway saloon headquarters, the German delegates could not keep their feet still in their nervous anxiety.

### Doing Their Bit

British film actors are doing their bit very handsomely. Gary Grant is giving \$150,000, his salary from one picture—to a British war charity and Charles Laughton has for some time been giving all his radio earnings to war relief and the Red Cross. Many others are donating generously.

### Valuable Glassware

Probably the most valuable single piece of glassware in existence is the Portland vase, a Roman art object now treasured by the British Museum. 2371

### Exports Are Increasing

#### Flax Production In Canada Boosted To Meet Empire's Needs

Britain needs fibre flax for war industries, and the Dominion Agriculture Department, using latest machine methods, is boosting Canadian production to meet the increased demand now that low-priced fibre from Russia and the Balkans is no longer available.

Already experts in Ontario, Quebec, and the Dominion Agriculture Department, together with co-operation by farmers, have increased flax acreage 100 per cent. over last year, to 21,000 acres.

In 1939, Canada exported 1,300 tons of high grade fibre. Expectations are that this year's export will range between 4,500 and 5,000 tons.

New machinery, brought from Belgium just before the Allied retreat from Flanders, will reduce the trying procedure of pulling, scutching and threshing of fibre flax to a swift, efficient process requiring no skilled labor.

The new machines, now in Canada with their Belgian inventor, Maurice Sonenens, left Antwerp on May 9, less than two weeks before its fall. The boat in which they were shipped was torpedoed, but the machinery was saved and is now being used to model further machinery at foundries in Plessisville, Que.

Fibre flax is in demand for making linen threads and canvas of all kinds for war equipment, such as tents and gun covers.

To the Empire, chiefly Canada and Northern Ireland, has gone the call to supply all British fibre flax needs.

### Britain's Plowing Program

#### Great Effort Being Made To Increase Country's Food Supply

Hon. Duncan Marshall, in the Owen Sound Sun-Times, says a plowing program is about to be put on in Britain to turn over another million acres of grass, and Sir George Stapleton, Britain's greatest authority on grass, suggests that at least 3,000,000 acres of clay under grass, from which very little results are received, should be plowed as soon as it can be definitely determined what suitable crops could be grown on this land. The drying of grass has been done extensively in Britain this year and it is agreed that pound for pound of dry matter, grass is equivalent to linseed cake. In some places where drying machines were not available the kilns for drying hops were used for drying grass. All these efforts which Britain is putting forth make us feel that as Canadian farmers we are not in this war at all. People have an idea that here we can grow more farm produce than we can ship so that extra effort is not necessary. I am not by any means sure of that. We must get food across the ocean if Britain is to survive and she will survive! Therefore, it behooves us to bend every effort to not only production now but to get our land in condition so that production can be kept up and our soil fertility will not fail us.

British women are donating aluminum pots and pans—and showing their mettle in other ways as well.

## Use Of Parachutes Saving Lives Of Many Members Of Royal Air Force

### Accidents In Farm Work

#### Certain Amount Of Danger Attached To That Occupation

The farm is not free from accidents, says the Peterborough Examiner. People may think as they drive along a country road and take a look at broad acres and pleasant fields that there is nothing there to suggest danger in employment. They might even contrast it with some of the factories with much machinery, or compare it with the traffic toll on the highways.

Yet the farm has its accidents. In looking at a Western Ontario paper we saw reports of five and they were all from a very limited area. One farmer was on top of a load of hay when the team bolted. He was working with a fork and had no chance to save himself; he's in hospital with a serious back injury. Another farmer was shingling a shed and slipped off, but the drop of 12 feet was sufficient to put him in bed. The man himself believes he had a slight sunstroke.

A young man jumped from a hay mow about half filled. He hit on a weak spot in the barn floor below, and he is believed to be suffering from concussion. On the same day a farmer not far distant, spoken of as being "well up in years," fell from a hay rack and broke his leg. He will be out for the busy season. The fifth man to be injured was fixing something around a mower when the horses started to move. He was badly cut on one foot.

A man has to have his wits about him working on a farm. It looks quiet, peaceful and safe from the road outside, but it looks different when you start to note the number of accidents being reported in farm operations.

### Comedy Rescue

#### Crew Of Naval Vessel Glad That Aviator Could Give Aid

German marksmen scoring a hit upon an R.A.F. reconnaissance machine's gasoline tank led to a "rescue comedy at sea."

With his gasoline leaking the pilot turned and tried to reach England. His fuel ran out and he landed alongside a small naval vessel. To facilitate rescue, the crew clambered out onto the wings.

Sailors from the naval craft at once swarmed over the side of their vessel and took up positions on the monoplane's submerging wing.

Alarmed for the safety of his crew, the pilot pointed out to the sailors that he had landed to be rescued by the ship.

"That's funny," said one sailor, "we jumped onto your plane to be rescued ourselves. You see we've just been torpedoed."

Both crews remained clinging to the plane wreckage until a destroyer showed in sight to rescue them.

The parachute is saving scores of British fighter pilots' lives in this war lives which are probably the most needed of all the Royal Air Force's flying personnel at present. On the fighter pilot depends a great deal of the allied resistance to the modern airplane-tank form of German attack.

Many of the pilots are not taken prisoner because of the open type of warfare chosen by the Germans. Pilots forced to land in enemy country have hidden in woods, farm buildings and in ditches, and at night they have stolen back through the battle zone to safety.

Most of these pilots have been reported "shot down" or "compelled to land" by brother flyers who saw them go down during combat.

Here are two of the latest examples: A young English fighter-pilot was shot down by anti-aircraft fire while fighting with a Messerschmitt 109. He took to his parachute and for 10 minutes of the time he was dropping to earth, he was a target for German shooting from the ground. He shook free from his parachute harness on landing, hid for a while, made his way towards the coast.

At the coast he was taken on board a friendly fishing smack. Within a few minutes of putting to sea the ship was shelled by a German torpedo boat. Then the German fired a torpedo, which missed. The fishing smack was carrying 16 German air force prisoners, some of whom had been in the air only a few hours before.

The torpedo boat swung to attack again. A running fight developed but the fishing vessel's single Lewis gun and the rifles of some British soldiers drove off the enemy. Four men in the smack were wounded. Next morning the fishing vessel reached a British south coast port.

The second story is about a sergeant-pilot during the last fighting in France. He had to make a forced landing with his Hurricane. Bomber bombers spotted his airplane and dropped bombs all round it without success.

He made his way into friendly territory and after 24 hours got a series of lifts in ration lorries to a French airfield which he discovered was being evacuated.

While I was there nine Dorniers arrived and made shallow dive-bombing attacks. Two were shot down by anti-aircraft fire. When that was over I pushed on, and eventually reached Wisques, near St. Omer.

Just before noon next day the airfield at Wisques was bombed from 30 feet by six Dorniers, which also fired their cannon-guns and machine-guns. I dived into a trench when I saw three bombs falling towards me. They fell nearby but did not explode.

The sergeant-pilot arrived at his home airfield safely.

### A King In Exile

#### Incident At Coronation Of King Haakon Has Been Recalled

At the historic cathedral in Trondheim, 39 years ago last June, the first King of an independent Norway in nearly 600 years was crowned. Now, that same King Haakon VII, is in English exile while in German-occupied Norway moves were afoot to force his abdication or dethronement. To the demand for abdication the 67-year-old King replied "No." Asserting that the demand was German-dictated, he said, "I feel convinced, in refusing to abdicate, that I act in harmony with the will of the Norwegian people."

Haakon, he was a Danish prince when chosen Norway's King, recalled his arrival in his adopted land and the attachment he had developed for the country and its people. "My motto has always been and will forever remain," he said, "Everything for Norway." One incident he did not recall. At his coronation the crown, too large even for this man of 6 foot 5, slipped over his ears. Some observers thought it an omen of the reign that was about to begin.

## An Exclusive Alice Brooks Design

Household Arts by Alice Brooks

Stunning Spread Cloth or Scarf Crocheted of String

PATTERN 6732

Pinwheel, worked 'round and 'round is one of those medallions that is so quickly memorized you'll want to keep right on making it for lovely, lacy accessories. Pattern 6732 contains instructions for medallions; illustrations of them and stitches; photograph of medallions; materials needed. To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## The World of Wheat

By H. G. L. STRANGE

Director, "The Crop Testing Pan."

Most farmers will find it necessary this year to hold back more wheat on their farms than usual until next spring or summer. Some farmers have bins now in good shape or which can be repaired. Other farmers may prefer to construct new bins. Still others may decide to construct temporary sides made of lumber or of wire fencing, or of wooden snow fencing, lined inside with thick tarpaper. These temporary bins are usually built without a roof and have simply a layer of straw for the floor. (This open storage should hold grain undamaged until the rainy season starts in the following spring.)

A cheap method of farm storage for those who use binders would be to go back to the old method of stacking. This adds one more operation, but many farmers who still stack think that the extra grade resulting by stacking makes up for the extra cost of the work.

Whatever method of storing is used on the farm, the bins or stacks should be securely fenced off to stop animals getting at them, for animals not only can break down the boards of a granary but can injure themselves by eating too much grain. Fireguards should be placed around the storage places and the grain should, if possible, be insured.

Following factors have tended to raise price: Australian wheat crop expected to be 100 million bushels less than last year -- 1940 Yugoslavian wheat production estimated at 66 million bushels as compared with 106 million in 1939 -- Preliminary estimates indicate the Canadian fruit production as considerably below that of 1939.

Following factors have tended to lower price: Canadian wheat carry-over at July 31st largest on record -- Final official estimate places Indian wheat crop at 402,600,000 bushels -- Estimated that U.S.A. will have wheat surplus of 370 million bushels.

## Extra Premium for High Quality Marketing Barley

Effective August 16th this year, Canadian maltsters will pay an extra premium of 3c per bushel for suitable CW 6 row, selected and unloaded at the malting companies, according to a joint announcement made this week by Canada Malting Co. and Dominion Malting Co.

It should be noticed that this is an addition to the 5c per bushel premium already in effect, thus making a total of 8c per bushel over the cash price of this grade of barley.

This action is being taken to encourage the growing and marketing of high quality malting barley. Farmers who are growing this crop and who desire to obtain the 8c premium would be well advised to use the greatest care in threshing their barley so as not to lower the grade.

## Burnside Notes

Born, in the Holy Cross Hospital, Calgary, on Monday, August 12th, to Mr. and Mrs. Stanley Coyne a son.

Mr. and Mrs. Lewis McCulloch, of Turner Valley, spent Sunday with relatives in the district. On their return they were accompanied by Mrs. Wm. McCulloch, who will take medical treatment in Calgary.

A demonstration on Home Decoration will be given on Thursday, August 29th at 3 p.m. in the Lone Pine Hall by Miss E. Lee of the Olds School of Agriculture. Everyone welcome. This demonstration is under the auspices of the W.I.

## Rugby Notes

The anniversary sports and supper at the Hall on August 14 passed off most successfully. The weather was good except for a few drops of rain which fell during the afternoon. Big Prairie won the softball tournament, defeating both Melvin and Elkton. When 6 o'clock came the long, well laden tables were quickly filled and waiters were kept very much on the run supplying the needs of the hungry crowd. After supper a short "quiz" program was held. This finished, the floor was cleared and dancing was commenced to the strains of "Fitz and his Fiddlers," and we would not like to say what hour the hands of the clock pointed to when the last car drove away. The Hall Board wishes to thank most heartily all who helped in any way to make the occasion such a success. Mr. Doug Landeen held the winning ticket on the quilt that was raffled.

Don't forget the dance for the Red Cross on Aug 23 at the Rugby Hall.

## Notes From the West

Mr. and Mrs. A. L. Hogg were Calgary visitors on Tuesday.

A shower was held in the Rugby Hall Tuesday afternoon in honor of Mrs. Bruce Swingle, nee Margaret Shannon. A gift of money was presented to the bride to purchase silverware. Quilt blocks were made and lunch was served.

## Elkton Wins Softball Tourney

Elkton softball team proved themselves to be tops when they came home with the money after winning the tournament held at Didsbury East Community over the weekend.

They whacked Didsbury Counter Hoppers 28 to 3 in five innings and then beat Lone Pine 21 to 2 in the final. Lone Pine had previously beaten East Community.

**LOW 30-DAY VACATION FARES to the PACIFIC COAST AND Canadian Rockies**

EVERY FRIDAY, SATURDAY & SUNDAY, MAY 31 TO SEPT. 29. Liberal stopover privileges allowed.

**The End of a Mine.**

Into action with their rifles go some of the crew of a British minesweeper. With their fire another mine they have brought to the surface is destroyed.

**Hunters Allowed  
Greater Scope**

Fall hunters in Alberta will be allowed greater scope this year, according to the new provincial fish and game regulations. North of the Athabasca and Clearwater rivers there will be an open season on prairie chicken and ruffed grouse from September 14 to Oct. 31 inclusive. South of this area to Township 39, the season on these birds is open from Oct. 1 to Oct. 31. As birds are reported plentiful in the north area, the season has been extended to provide six weeks shooting.

Ducks, geese, rails, coots and Wilson snipe may be shot in three districts: North of Athabasca and Clearwater from September 7 to November 7 inclusive; south of this area to a line through Duthill, Calgary, Strathmore, Medicine Hat and Walsh the season is Sept. 15 to Nov. 13 inclusive; south of the C.P.R. bordering the last named territory Sept. 15 to Nov. 13 inclusive. Bag limit for ducks is 12 per day, 100 for the season with no more than 36 in one person's possession at one time; for geese, 5 a day or 25 for the season. Hungarian partridge have been opened in a greater area, too. They may be shot as far north as the Clearwater and Athabasca from October 1 to Nov. 30, with a bag limit of 10 per day and 150 for the season.

Shooting season for male deer and moose will open Nov. 1 and continue to Dec. 14; elk Oct. 14 or 31 depending on the area; mountain sheep and goats Sept. 2 to Oct. 31; caribou Nov. 1 to Dec. 14; bear Sept. 2 to 14, 1941. Antelope shooting will be determined by conditions obtaining at the time the season opens.

**Province's Road Equipment  
On War Service**

Alberta's modern road building equipment from No. 1 Highway has gone on war service. Hon. W. A. Fallow announced the machinery had been transferred to the Federal government for urgent war requirements. This, the second transfer, included the machine which surfaces 25 feet of highway a minute—the only one of its kind in Canada.

**Billy Brown  
Builds New Barn**

The new barn of W. E. (Billy) Brown is of Gothic structure with a bell roof and a tall ventilator. The round roof is 27 feet from loft floor to peak. The building is 36 feet by 36 feet, with 12 cow stalls, single style mangers with water cups, gutter and cement floor. In the full-size basement of the dwelling is an electric pump and pressure tank, forcing the water through the pipes to the barn and dairy house. The barn is being painted grey with white trim and is a credit to the farm, bought last fall by Mr. and Mrs. Brown when they came from Didsbury, Alberta—Chilliwack Progress.

For the harvest—75 prs. Watson's Kangaroo Gloves at \$1.00 pair, can not be duplicated at present prices.  
J. V. Berscht & Sons

**One Way to  
Store Grain**

Grain farmers may have no fear of the rumored lumber shortage if they will build straw and wire bins for the storage of their crops. It is intimated by experienced grain men.

With a bed of two feet of straw on dry ground, hog wire can be erected on posts all around and the grain threshed into the enclosure. A good temporary granary is assured, straw being used for the sides. Thatched with green-feed sheaves, the jury-rig is guaranteed to withstand months of weather conditions.

**Government to Waive  
Seed Grain Liens**

Grain storage problems consequent upon the war situation have resulted in the provincial government deciding to waive liens on seed grain advances, so that farmers may be assured of threshing expenses. Then, following representations of various interested bodies, Hon. E. C. Manning urged immediate federal action to arrange substantial advances on stored grain. Wholesalers and retailers joined with chambers of commerce and farmer organizations in stressing the urgent need of the moment, and declared a financial crisis was facing the west.

**CARD OF THANKS**

May we, through the medium of the Pioneer, express our thanks to those who so kindly helped during the recent registration, especially to the voluntary assistants: the Boy Scouts; Law's Drug Store, the Pioneer and C. E. Rieber, for supplies. The Deputy Registrars.

Berscht & Sons have 100 pairs only of Watson's Horsehide Gloves for harvest wear at \$1.00 a pair, and they cannot be duplicated at present price. Hurry, while stock is fresh!

## WORLD HAPPENINGS BRIEFLY TOLD

A Swiss newspaper figures out that of the last 600 years in France's history, 371 were war years.

Chinese interests have established air mail and passenger services linking Chungking, China, with Rangoon, Burma.

The Treachery Act providing the death penalty for certain acts against the public or assisting the enemy, was passed by the senate.

Establishment of air mail service between the United States and New Zealand completed the last link of an around-the-world service by way of Australia.

Griffith Brewer, pioneer in British aviation, who represented the nation in four balloon races between 1906 and 1922, has been elected president of the Royal Aeronautical Society.

Lord Beaverbrook, minister for aircraft production, announced that the public has contributed approximately \$9,156,888 to buy warplanes for Britain.

During Savings Week 185 children of the senior school in Leiston, England, contributed £585 (\$2,603), an average of more than £3 (\$13.35) a head.

Kenneth A. McLeod, 81-year-old Edmonton contractor, who walked beside an ox-drawn Red River cart from Winnipeg to Edmonton in 1881 and became one of Alberta's prominent businessmen, died at his home in Vancouver.

## GIRLS' STYLE HAS WAISTBAND

By Anne Adams

This pert frock is designed by Anne Adams to delight the belle-of-tomorrow. The smart mother-of-today will like it too, for its trim wearability and easy "sew-ability." Make Pattern 4495 for your daughter in one of the spirited new cotton plaids. Both the front-pointed waist-girdle—a particularly attractive feature—and the panel of the flaring skirt would look striking out on the bias. There are two neckline styles: one square and simple; the other trimmed with a collar which may merrily contrast. Pockets, bows and lace of ric-rac edging are extra gay notes. Take your choice of short puffed sleeves or long, full ones. And send for a pattern without delay!

Pattern 4495 is available in girls' and junior sizes 8, 10, 12, 14 and 16. Size 12 takes 2½ yards 35 inch fabric and 2½ yards lace edging.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

## I Read --- And Write --- For You

By JOHN C. KIRKWOOD

Those sidewalk photographers who snap you speculatively have revived the tintype—with, perhaps, a variation. That is to say, instead of giving you a piece of tin with your photograph on it, they may give you a piece of paper; a highly sensitized black-backed paper may be used—paper which will last a long time.

It takes about one minute to take and deliver to you your photograph. A special camera is used—one with its own dark room attached.

Perhaps these tintype photographers have not yet begun operation in Canadian cities, but you can find them at Coney Island, by way of example. They charge you only 15c for your photograph.

About that big snow cruiser which Admiral Byrd took with him last year—or was it this year?—to the Antarctic, to enable him to traverse the snow-covered, ice-covered plains of the South Pole region. It has so far been a flop. It weighs 75,000 pounds, and you probably read a lot about it and its journeying to the ship which carried it to its destination—a very troublesome journey. It was designed, with implicit confidence in its ability to do its intended job, by a 35-year-old engineer, Charles Meyer. Meyer went with his monster baby to the Antarctic, and so himself is able to explain the machine's failure. It lacked sufficient power. Recurrent snowfalls put an 18 or 20 inch soft blanket over the ice-field, and this covering made it difficult for the great cruiser to get through and over it. But all is not lost. If and when the plain is covered with solidly frozen snow, it is expected that the cruiser will function as planned and hoped.

In Western Pennsylvania and in Philadelphia something is being done to teach young people how to operate a business. In these areas are 22 companies, representing 250 youths of both sexes, ages from 16 to 24. A group of these young people decide to form a company to make something—say a 25-cent clothes line reel or a \$15 incubator. They obtain two business or professional men to sponsor—finance their company. They apply for a charter. They subscribe for stock, and appoint officers—a

president, a treasurer, a board of directors. Their factory may be a cellar or an abandoned building. They peddle their products to housewives.

The shares of the company may be priced 10 cents. An accurate record is kept of manufacturing costs and of overhead and other costs. A budget is drawn up. A profitable selling price is set. Profits are turned back into the enterprise. This sort of schooling gives those forming the company a liberal, practical education in what business is; also, it adjusts personal temperaments. Vindictiveness, laziness and such characteristics are ironed out.

These Pennsylvania organizations are linked with a national organization called Junior Achievement, which boasts more than 5,000 embryo "industrialists," and 40,000 graduates—those who have passed the eligible for participation. Junior Achievement has been going for 20 years.

This year is the centenary of the death of Nicolo Paganini, the great violinist. Paganini was one of the most fantastic and extraordinary figures, not only in the annals of music, but also in the entire history of the human race. He revolutionized violin playing. With his magic fiddle he roamed over Europe. Many who heard him really believed that he was in league with the devil. One teller of tales about him said:

"When Paganini was playing his 'Witches' Dance last night, I distinctly saw Satan himself standing behind him guiding his left hand and his right arm. His Satanic Majesty was clothed in red; he had horns upon his head, and a long hairy tail between his legs."

This story caused uncounted thousands to go to his concerts. Another legend was that his dying mother had with her last breath breathed her soul into his violin and that this enabled him to play with heartrending pathos.

Henri Ernst, the great Austrian violinist, in his youth followed Paganini around on his tours. He made it his practice to engage a room in the hotel next to Paganini's, and he bored holes through the doors in order to watch the great virtuoso practising.

## Temporary Silos

Several kinds of temporary silos can be prepared in a hurry in order to conserve surplus crops and prevent loss of much good feed. Trench silos and pit silos, topped with layers of straw and soil have been used for many centuries; the latest stunt is to use three or four rounds of snow fence lined with roofing or heavy building paper.

## Fewer Dairy Products

Dairy products produced in Canada in 1939 are estimated to value \$217,716,029, a decrease of \$8,439,267, or 3.7 per cent, compared with 1938. All provinces registered declines except British Columbia.

## Helps Solve Problem

Fencing off 15 acres of his farm for wild life, a North Dakota farmer says: "I believe that providing an area for the nesting and protection of wild life, grouse, Hungarian partridge, pheasants and other birds, will help me solve some of the insect problems on the farm."

## Torpedoes Travel Fast

A type of torpedo used by the British and the Royal Canadian Navies consists of a hollow steel body and an explosive head. It is cylindrical in shape, 22 feet long and 21 inches in diameter and weighs over one-and-a-half tons. It travels at a speed of about 50 miles an hour.

## Save Scrap Metal

Easterners Put Forth Many Efforts To Further War Aid

Scrap metal—anything from German helmet trophies of the first Great War to the tin foil from cigarettes—is being collected and sold for the Red Cross; children are putting on "circuses" and garage theatricals for ambulance funds; women are giving war savings stamps as bridge prizes; men are holding wrestling matches to help the cause—Ontario continues to be a hive of bustling win-the-war activity.

In Kitchener the city council endorsed a suggestion that truck owners be encouraged to give soldiers in camp at Stratford transportation home for weekends. Motorists generally are generous in giving "lifts" to men in military uniforms.

Hamilton Boy Scouts collected a vast quantity of scrap, sold it to munitions firms for \$700 and gave that money to the Red Cross and the home guard.

A "Save Your Scrap League" was formed in Toronto and the movement was spreading to many places during the last week.

Women of Port Credit held a series of "canning bees" and were well on their way to supplying nearly 3,000 tins of strawberry jam to soldiers in Britain.

## Congratulations In Order

Australia Is Proving Her Power In Empire's Defence

Proudly, though not without envy, Canada congratulates Australia upon the victory of her cruiser Sydney. This gallant ship bore a name with a niche in British naval history—the Australian "Sydney" of the Great War which finally cornered and sank the famed Emiden. Thus was honored tradition.

The Italian cruiser Bartolomeo Colleoni was a powerful new ship, matched the Sydney in guns, out-matched her by ten knots in speed. Yet despite this advantage, considerable in manoeuvring, she was sent to the bottom, the cruiser accompanying her put to flight.

Rome's propagandists, whose tales of imaginary victories have provoked the world's mirth, will be hard put to explain this defeat. And this second flight of the Italian navy.

Meanwhile the whole Empire salutes its brothers "down under."—Ottawa Journal.

## Had His Reward

New York Merchant Made No Mistake In Trusting Customer

This story was told by Leonard Lyons, in the New York Post:

August Heckscher purchased a straw hat recently, in a shop on Madison avenue. The hat cost \$1.39, but Heckscher—who didn't reveal his identity—confessed that he had only \$1.25 on his person.

"That's all right, take the hat, and you'll owe me 14 cents," said the proprietor. "You look like a man I can trust." The next day Heckscher visited an industrialist who expressed admiration for that hat, and who then was told the 14-cent story.

"Each year, when I send my 600 employees to a summer camp, I give each one a straw hat," said the industrialist. "Let's reward that man." And so he went to the Madison avenue shop where Heckscher sent him, and bought out the entire stock.

## Needs No Runway

Jump Take-Off Enables Rotor Plane To Rise Vertically

An airplane that needs no runway for its take-off was demonstrated successfully at Willow Grove, Pa., by the Pitcairn Autogiro Company, pioneer American rotor plane manufacturer.

The new machine was described by Harold F. Pitcairn, president of the company, as a plane "completely independent of ground obstacles or size" for its take-off and landing. He said the new gyro needs space only one-eighth the size of a regulation airplane field for its landing and take-off.

Called the "jump take-off," the new feature of the plane enables it to rise vertically for approximately 20 feet, then take a normal climbing angle for further ascent.

Company officials said its use for military scouting and contact work is possible.

## SAFE DRIVING

Nineteen thousand, two hundred persons were killed at night in motor vehicle accidents in the United States during 1938 and a proportionate number in Canada where the total number of such accidents was 1,545.

In United States, although less than one-third of the total daily traffic was on the highways at night, 59 per cent, of all fatal traffic accidents occurred during the hours of dusk and darkness.

The amount of driving after drinking is higher at night and the hours of greatest fatigue are the hours of darkness; but the Committee on Night Traffic Hazards (1939) says that lowered visibility constitutes the major difference in the hazards of night and day driving. This condition may be eliminated to some degree by observation of certain requirements: Motorists should keep their headlights in good condition with the lens clean on both sides, the bulb not blackened, and the reflector shining; the electrical connections in proper condition so as to ensure adequate voltage at the lamps; if the head lamps are aimed and focussed correctly; that is, if the upper beam is used when there are no approaching drivers and the lower beam is always used when approaching other drivers and when driving on lighted highways and lighted city streets.

The average headlamp on the road is producing less than half its possible light because of tarnished reflectors, dirty lenses and blackened bulbs. The new "sealed beam" of 1940 cars is designed to provide higher light output in the driving beam for the open road and less glare for the oncoming driver than when the traffic beam is used.

City lights are still poor; they have continued much as they were in the horse and buggy days; they emit rays in all directions at about the same intensity. In many places where modern safety installations have been made, there has been a reduction of 37 per cent, in the night accident fatalities in the first 11 months of 1938 as compared with 1937.

Some cities seek to economize by waiting to turn on their lights until it is quite dark, forgetting that the traffic is the heaviest in the late hours of the day. If any reduction of street lighting is desirable it should be made in the early morning hours of summer when the streets are comparatively empty. The multiplicity of neon and other electrical signs in areas where traffic is controlled by stop and go signals has created a problem. Much study of traffic problems is needed in order to make night driving as safe as that of the daytime.

**Editorial Note:** Readers who would like a valuable set of articles on the Cause and Control of Cancer may obtain them—free of all charge—by writing to: The Health League of Canada, Dept. W.N.U., 111 Avenue Road, Toronto, Ont. Just say: "Please send me Dr. McCullough's articles on Cancer", and print your name and address plainly.

## Won His Case

Now comes a man who brought suit against a tennis club because its members were forever hammering balls into his yard. Charging it "caused substantial discomfort and inconveniences." C. M. DeYoung went to court in Halifax, N.S., with his case—and won it. He was awarded damages of \$100.

Because of the ban on the shipping of goat and sheepskins out of North China farmers there refuse to raise goats and sheep.

NEW YORK, N. Y.—"IT'S TRUE!" that Fay Holden, the mother of the Hardy Family, and an expert swimmer, has improved her natation by mastering the "back crawl," says Wiley Padan. "She learned it while vacationing in the desert. A young Indian swimmer coached her in the stroke, one of the most difficult in swimming."

The three fur coats worn by Judy Garland in 'Andy Hardy Meets Debutante' are her own and are the first important articles of her wardrobe that she has purchased entirely on her own judgment.

"The engagement ring which will appear on the finger of Cecilia Parker in this film is her own and has in it an antique rose-cut diamond which has been in the family of her husband, Dick Baldwin, for 150 years."

## This breakfast SPEAKS FOR ITSELF!

**DAD LENDS AN EAR!** The moment he pours on the milk or cream, he hears Rice Krispies chattering to him with their merry crackle-pop-snap. They just beg to be eaten. So down-right crisp—and they stay crisp to the very last spoonful!

### New thousands now demand POP-CRACKLE-SNAP chorus daily!

All over Canada, children and grownups listen every morning to the cheery song of crispness. Breakfasts are gayer when golden-brown Rice Krispies tumble into family cereal bowls! Tests show that Rice Krispies stay floating for hours in milk or cream. "Rice Krispies" is the trade-mark of the Kellogg Company of Canada, Limited, for its delicious brand of oven-popped rice. Order several packages tomorrow. Made by Kellogg's in London, Canada.

By Edgar Wallace

Copyright, by Edgar Wallace.  
Serialized by Ledger Syndicate.

### CHAPTER XII.—Continued

She had not anticipated that it would be Harlow himself who would open the door to her. He wore a black frock coat, the ample skirts of which gave a faint illusion of a robe. She particularly noted his attire. A large white wing collar and a stiff-looking cravat of heavy black silk, a double-breasted waist-coat across which was looped a heavy golden watch guard—he had the sartorial distinction of a ducal butler and was as much unconscious of his elegance. But the old thrill? \*

Without realizing her action she shook her head slowly.

His was a tremendous personality, dominating, masterful, sublimely confident. But he was not god-like. Almost she felt disappointed. Yet if he had been the Harlow of her mind it is doubtful whether she would have entered the house.

"Most good of you!" He helped her to struggle out of her heavy coat. "And very good of Stebbings! The truth is that my secretary is down with flu and I hate employing people from the agencies."

He opened the door of the library and, entering, stood waiting with the edge of the door in his hand. As she stepped into the library her foot slipped from under her on the highly polished floor and she would have fallen, but he caught her in a grip that was surprisingly fierce. As she recovered she was facing him and she saw something like horror in his eyes—just a glimpse, swift to come and go.

"This floor is dreadful," he said jerkily. "The men from Herran's should have been here to lay the carpet."

She uttered an incoherent apology for her clumsiness, but he would not listen.

"No, no—unless you are used to the trick of walking on it \* \* \*

His concern was genuine, but he made a characteristic recovery.

"I have a very important letter to write—a most important letter. And I am the worst of writers! Dictation is a cruel habit to acquire—the dictator becomes the slave of his typist!"

His attitude might be described as being genially offhanded. It struck Aileen that he was not at all anxious to impress her. She missed the smirk and the touch of ingratiating pomposity with which the middle-aged business man seeks to establish an impression upon the new and pretty stenographer. In a sense he was brusque, though he was always pleasant. She had the feeling of being put in her place—but it was an exact grading—she was in the place she belonged, no higher, no lower.

"You have a book? Good! Will you sit at my table? I belong to the peripatetic school of dictators. Comfortable? Now—"

He gave a name and an address, spelling them carefully. The letter was to a Colonel Harry Mayburgh, who had an office in Wall Street.

"My dear Harry," he began. The dictation went smoothly from here on. Harlow's dictation was a little slow but distinct. He was never once at a loss for a word, nor did he flounder in the morasses of parentheses. Toward the end of the letter:

\* \* \* the European situation remains settled and there is every promise of a revival in trade during the next few months. I, for one, will never believe that so unimportant a matter as the Bonn affair will cause the slightest friction between ourselves and the French.

She remembered now reading of the incident. A quarrel between a sous-officer of the French army and a peppery British colonel who had gone to Bonn.

So unimportant was the incident that when a question had been raised in the House of Commons by an inquisitive member, he had been greeted by jeering laughter. It seemed surprising that a man of Harlow's standing should think it worth while to make any reference to the incident.

He stopped here, pinching his chin and gazing down at her abstractedly. She met the pale eyes was conscious that in some ineffable manner his appearance had undergone a change.

The pale eyes were deeper set; they seemed to have receded, leaving two little wrinkles of flesh to spoil the unmarked smoothness of skin. Perhaps she was mistaken and was seeing now, in a leisurely survey, characteristics which had been overlooked in the shock of meeting him at Fotheringay Mansions.

"Yes," he said slowly, answering, as it were, a question he had put to himself. "I think I might say that. Will you read back?"

She read the letter from her notes and when she had finished he smiled. "Splendid!" he said quietly. "I envy Mr. Stebbings so efficient a young lady."

He walked to the side table, lifted a typewriter, and carried it to the desk.

"You will find paper and carbons in the top right-hand drawer," he said. "Would you mind waiting for me after you have finished the manuscript? I shall not be more than 20 minutes."

She had made two copies of the letter within a few minutes of his departure. There were certain matters to be considered; she sat back, her hands folded lightly on her lap, her eyes roving the room.

Mr. Harlow's splendor showed inoffensively in the decorations of the room. The furniture, even the bookcases which covered the walls, were fashioned in the Empire style. There was a pervading sense of richness in the room, and yet it might not in truth be called over-ornate, despite the gold and crystal of the candelabra, the luxury of heavy carpets and silken damask.

So roving, her eyes came to the fireplace where the red coals were dying. On the white-tiled hearth immediately before the fire a little screw of paper had been thrown which, under the influence of the heat, had opened into a crumpled ball. She saw a pencilled scrawl.

"Marling."

She spelt the word thought at first it was "making." And then she did something which shocked her even in the act she stooped and picked up the paper, smoothed it out, and read quickly, as though she must satisfy her curiosity before her outraged sense of propriety intervened.

I really must ask for my writing material. Please leave me that. How can I prepare my history? MARLING.

The handle of the door turned; she slipped the creased paper into the bag which was open on the table and closed the flap as the stony-faced Mrs. Edwins came into the room.

She came to the desk where the girl sat, her big, gaunt hands folded. Her disparagement conveyed rather than expressed.

"You're the young woman," she stated.

"I'm the young woman," smiled Aileen, who had a soft spot for age.

She grew a little uncomfortable under the silent scrutiny that followed.

"You're a typewriter?"

"A typist—yes. I am Mr. Stebbings' secretary."

"Stebbings!"

Mrs. Edwins' voice was surpris-

ingly harsh and loud. The sudden change which came to her face was remarkable. Eyes and thin lips opened together in startled surprise.

"Stebbings? The lawyer? You've come here from him?"

For a second the girl was too startled to reply.

"Yes, \* \* \* Mr. Harlow asked that I be sent; his secretary was ill—"

"Oh, that's it!" Relief unmistakable.

And here it flashed on the girl that this must be Mrs. Edwins—that L. Edwins to whom reference had been made in the will of the late Miss Mercy Harlow. Perhaps her nerves on edge, the woman received the thought, for she said quickly:

"I am Mrs. Lucy Edwins—Mr. Harlow's housekeeper."

### CHAPTER XIII

Aileen murmured some polite commonplace and wondered what was coming next. Nothing, apparently, for, with a quick glance round the room, the woman sailed out, her hands still clasped before her, leaving the girl to her penitence and self-reproach. And these distresses were inevitable. A prying kitchen maid (she told herself), who read her mistress' letters and poked into the mysteries of locked drawers was a pattern of decorum compared with one who had some pretensions to being a lady and yet must inspect the waste paper of a chance employer. She was of a mind to throw the paper into the fire, but it was natural that she should find excuses for her conduct. And her excuse (stoutly offered and defended to herself) was Jim Carlton and the vague familiarity of "Marling."

Ten minutes passed and then Mr. Harlow came slowly into the room. The door closed with a click behind him and he stood before her on the very spot where Mrs. Edwins had conducted her cold survey.

"My housekeeper came in, didn't she?"

"Yes." She wondered what was coming next.

"My housekeeper," he spoke slowly—"is the most unbalanced female I have ever known! She is the most suspicious woman I have ever known, and the most annoying woman I am ever likely to know."

His eyes did not leave her face.

(To Be Continued)

### Considered Best Feed

#### Experiments Show Barley Is Superior For Bacon Production

According to the report for 1939 and up to July 1, 1940, of the National Barley and Linseed Flax Committee submitted at the recent meeting of the National Advisory Committee on Agricultural Services held in Ottawa, on July 17th, the results of the barley feeding experiments show conclusively that barley is superior to corn or oats as a feed for bacon production. This superiority is both in the cost of production and in the quality of bacon produced. The grades of feed barley have been improved to meet this demand. There is, however, continues the report, a further problem that might be considered by the National Feed Committee, namely, that of grading barley feed.

### The Standard Parachute

Measures 24 Feet Across And Cost Is About \$200

Parachutes have played a big part in the war in Europe. Not to speak of what they have done for so-called "parachute troops," we may think of the hundreds of aviators who have been saved by them. With a plane burning, or in some other way made unfit for flying, the pilot and anyone else aboard may leap out and reach the ground safely.

Parachutes differ in size, so we cannot give figures which will fit all of them. Recently a standard British parachute was described as having "65 square yards of finest silk" and as measuring 24 feet across. The cost was given as about \$200 for each parachute.

### Food By The Ton

The daily issue of foodstuffs to feed an army division of, for instance, 16,000 men, takes on gigantic proportions. Eight tons each of beef, bread and potatoes, one ton of jam, another of butter, as well as 25 pounds of pepper are required.

## BURGESS RADIO BATTERIES

Cost  
Less

Because . . .  
they have much more  
active electric pro-  
ducing material and  
last much longer.

Always buy the batteries with the  
Black and White Stripes

## HOME SERVICE

### EASY TO GIVE YOUR DOG THE PROPER SUMMER CARE

#### Take These Rules for a Guide

Summer heat waves affect your dog as they do you. But it's not hard to keep your dog healthy and happy all year round—even during the difficult "dog days"—when you know the proper care.

It's always important for a dog to have plenty of fresh, pure drinking water. During a hot spell keep his drinking pan shaded and refill at least three times a day.

If your dog enjoys swimming let him cool off this way as often as he likes. But frequent bathing with soap is bad for his skin and unnecessary, since doggy odors are not due to perspiration but to wrong diet, unclean sleeping quarters, lack of right grooming and exercise.

In warm weather a full-grown dog should be fed once a day and meat as well as in winter. A well-balanced diet includes milk and vegetables, but not too many starches.

And don't be alarmed if your dog eats grass. Grass is a natural laxative he may need.

Complete details on the right list are given in our 32-page booklet. Tells how to recognize and treat dog ailments; has instructions on grooming, housebreaking, training, teaching clever tricks.

Send 15c in coins for your copy of "How to Choose and Care for Your Dog" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

- 187—"Decorative and Useful Things to Make with Paper."
- 186—"Songs from 'Way Down South'."
- 180—"What You Should Know About Nursing."
- 172—"Effective Phrases for All Occasions."
- 168—"Etiquette: The Correct Thing To Do."
- 147—"How to Budget and Buy for Better Living."

#### Retains Value Indefinitely

British doctors and scientists have discovered a method of keeping blood for transfusions so it retains its value indefinitely. Health Minister MacDonald told a luncheon meeting in London, according to a British Broadcasting Corporation report. He said that up to now blood obtained from voluntary donors retained its value for four weeks only.

#### Guns Shoot Eight Miles

The six 1500-ton destroyers of the Royal Canadian Navy are equipped with 4.7" guns, which can throw about a ton of metal a minute as far as eight miles.

## LOCAL & GENERAL

Mr. and Mrs. Russell Ady are on a motor tour in the Banff and Jasper parks this week.

Messrs. Tom Johnson and J. W. Halton are spending this week at Jasper. They motored via the Banff-Jasper highway.

Mr. and Mrs. A. Brusso, who had been vacationing in the mountains for the past ten days, returned home on Monday.

Mr. and Mrs. Jack Pearson, of Bashaw, visited with the latter's mother, Mrs. George Liesemer, last week end.

Head west for Rugby tomorrow night (Friday) and trip the light fantastic in aid of the Red Cross. Merry-makers 5-piece orchestra.

Pete Miquelon leaves today for Eckville where he will relieve the agent at that point for the next two weeks.

J. V. Berscht & Sons Harvest Sale starts next Saturday! Special values are offered, so take advantage of these seven big days of savings!

Mr. and Mrs. Carl Sanderman, Mr. and Mrs. Elmer Sanderman, Mr. Paul Sanderman, and Mrs. C. Stewart, all of Iowa, are the guests of Mr. and Mrs. Lee Sanderman.

Piano Tuning—Busier than in 30 years' service, Gavin Spence, the old reliable, is still in the district with Virgil Goulson. "There's a reason!" Leave orders at the Pioneer Office.

For best values in harvest shoes, stooking gloves, overalls and shirts—buy at Scott's.

The Didsbury - Carstairs Band went in full strength to Sylvan Lake on Sunday, where they gave concerts both afternoon and evening. They were very well entertained while there and were given a free trip on the motor launch "Norell."

Mr. and Mrs. Tom Morris and family returned last week from Toronto and other Ontario points. They returned via the all-Canadian route via Lake Superior. Tom says that old Ontario looked good after an absence of 20 years, but that the West looked better.

It's a shootin', bootin', high falutin' Western for the movie fans tonight, tomorrow and Saturday, when Bill Boyd blazes a trail for the railroad in "Range War." Also 2nd in Canada Carries On Series, "Atlantic Patrol." Bid dull care farewell for a spell, refresh yourself at the movies.

Try a pair of Scott's \$2.75 harvest shoes, they are extra good value.

A "graveling bee" by the district ratepayers was held last Friday, when a sizeable stretch from the new highway to the Rosebud School was completed. This will no doubt please the parents and teacher alike. There is also a driveway in front of the school porch, which new means "no more gumbo in school."

An article and photograph on the "Farm Women's Week at Olds," appearing in the August 14th issue of the Family Herald & Weekly Star was written by Marjorie K. Stiles, who lives east of town. The photo group includes, among others, Mrs. Jas. Hosegood, pianist for community singing, who has attended this annual event since its inception five years ago, Mrs. N. Eckel, Mrs. Bert Pross, Mrs. E. Hunter, Mrs. Cliff Gibbs, Mrs. Byrt, Mrs. D. Evans, Mrs. Bob McFarlane, Mrs. Owens, Mrs. Clark Ray, little Marjorie Orde, who has attended three times along with her mother, Mrs. Avar Orde, and grandmother, Mrs. A. L. Hogg, another oldtimer at this yearly affair.

The Didsbury Union, W.C.T.U., are sponsoring a Medal Contest, to be held the latter part of the summer. Children between the ages of 6 and 15 years are eligible and are welcome to take part. Please see Mrs. Wilfred Klein for selection of pieces; also, she will be pleased to help train anyone desiring her to do so.

I.H.C. Binders from Harold E. Oke are still on sale less the \$30.00 War Exchange Tax. See me at once!

Large shipment of Kangaroo and Horsehide Gloves has arrived and say are they good at \$1.00 per pair. These will go like hot cakes at Berscht's.

## LOCAL & GENERAL

Mrs. Milt Ford, of Carstairs, was relieving at the local telephone office during the week.

Mrs. Det Fulkerth left Wednesday for Chilliwack, B.C., where she will join her husband.

Good all leather stooking gloves for 75c and 90c a pair at Scott's.

Miss Lois Edwards, of the telephone staff, went to Innisfail on Sunday to relieve at the telephone office there for a few days.

Mr. and Mrs. Len Berscht, who had been spending their honeymoon at the Pacific coast, returned home on Tuesday.

Try a pair of Watson's Kangaroo Harvest Gloves from Berscht's.

Brown Jersey Gloves, 2 pair for 25c at Berscht's.

Rev. A. F. Reiner, pastor of the Lutheran Church, leaves this week for his vacation. During his absence Mr. R. Goetjen will have charge of the services.

Rev. J. M. Fawcett went to Calgary on Wednesday to attend the funeral of Mr. J. H. McGuire, his vice-president of the Southern Alberta Auxiliary of the Bible Society.

The Missionary Circle of Jutland Sunday School will hold an Ice Cream Social on the lawn at Mr. and Mrs. Lloyd Hehn's place this Friday evening.

Not to be duplicated at present prices are 50 pairs of Men's Work Socks for harvest at 4 prs. for \$1.00 at J. V. Berscht & Sons.

STILL FREE! I.H.C. Binders, of the War Exchange Tax of \$30.00—see H. E. Oke at his I.H.C. office.

Mrs. Harry Pearson went to Calgary last week to stay with Mrs. Parker Reid, who is convalescing after being in hospital.

Films—Bring your snapshots to Law's Drug Store, 25c a roll, 36-hour service.

School Opening Specials for 7 days at great savings. See large posters J. V. Berscht & Sons.

Get one of Scott's \$1.00 work shirts, just the kind for harvest.
